

## Construction Alert: Week of April 28, 2025

Median removal on South Palm Canyon Drive in the project area is planned the week of April 28 in preparation for long-term traffic control starting the week of May 5.

### TRAFFIC IMPACTS

**Monday through Friday**  
**7 a.m. to 3:30 p.m.**

- During work hours, the NB and SB inside lanes on S. Palm Canyon Drive will be closed from south of Camino Parocela to the bridge over Tahquitz Creek.
- The NB and SB left-turn lanes on S. Palm Canyon Drive onto E. Sunny Dunes will be closed.
- The western sidewalk on the bridge will remain closed through construction of the western bridge span.

*This schedule may change due to weather or field conditions.*

**Please observe all signage in the project area and use alternate routes.**

The median removal is necessary to create space to shift traffic onto the eastern bridge span for the long-term traffic control and lane closures beginning the week of May 5, 2025.

Crews will continue to work outside of the non-disturbance buffer for nesting birds to comply with environmental requirements.
