

PROJECT UPDATE: Friday, Oct. 23, 2026

South Palm Canyon Bridge Nears Final Stage, on Track for Late 2026 Completion

PROJECT UPDATE

Crews recently completed several concrete pours including the approaches to the eastern bridge span and the center section connecting the new eastern and western bridge spans.

Upcoming work includes constructing barrier rails, the eastern bridge sidewalk, curbs and gutters.

LOOKING AHEAD

The final stage of construction will begin mid-November.

Stage 3 will include construction activities such as artwork installation, irrigation, final paving, and striping.

Check the website or social media for upcoming traffic updates.

Businesses remain open and accessible during construction.

Crews are placing concrete for the eastern bridge approach, the section of roadway that connects the new bridge to South Palm Canyon Drive.

Crews are placing concrete for the center section of the bridge, connecting the new eastern and western spans to create one continuous bridge.
